

SENIOR PERFORMANCE REPORTING ANALYST

Position Title:

Senior Performance Reporting Analyst

Job Type:

Full time, permanent

Reporting to:

Manager, Upstream Accounting & Analytics

Location:

Calgary Head Office

Company Profile:

Pieridae owns and operates natural gas and liquids-producing assets across Canada, with a primary focus on our Foothills assets in Alberta which produce approximately 40,000 boe/day, in addition to three major sour gas processing facilities. Pieridae employs approximately 300 people across its operating locations and Calgary head office. We are an inclusive and diverse team with many exciting challenges and opportunities for learning and career growth.

Position Summary:

The Senior Performance Reporting Analyst is a key member of the Reporting and Analytics Team. She/he utilizes collaboration skills to work cross functionally to assist in coordinating the annual budget submission, monthly forecasting, and internal operational reporting. The Analyst will identify, evaluate, and implement business intelligence solutions to improve reporting effectiveness and enhance corporate efficiency.

Key Responsibilities:

Reporting and Analytics

- Assist with operations forecast and annual budget submissions with the ability to identify and signal changes
- Prepare monthly analysis on operational performance and results relative to budget and forecast
- Support month-end accrual cycle
- Detailed look back analysis, deep dives and communication to all operational teams
- Recommend, design, develop, and implement key operational performance indicator (KPI) reports for the weekly production review and monthly accountability processes
- Mentor engineering, technical and operational team members to increase awareness and enhance final outputs of budget/forecast/reporting with a focus on standardization and continuous business improvement
- Other detailed analysis and other duties as required

Business Intelligence

- Investigate and introduce technology-based reporting tools such as data cubes to improve organizational reporting efficiency
- Provide training to engineering, operations and finance staff to maximize the strategic value of data cubes or other technology-based data reporting/analytics tools
- Investigate robotic process automation (RPA), machine learning, and artificial intelligence solutions related to operations data management, analytics, and reporting.

Education and Work Experience

- Minimum 10+ years of related experience in upstream and/or midstream energy industry
- Bachelor's degree in Accounting, Finance, Economics, or related discipline
- Strong analytical skills, ability to collect and analyze information and data, highlight key insights to support recommendations and decisions
- Proven business acumen and demonstrated history of achievement in process implementation and efficiency improvement
- Pays strong attention to detail and ensures accuracy
- Results oriented, strong organizational skills and proven ability to prioritize, multi-task and meet deadlines in a fast-paced, demanding environment
- Experience with database management and integration, business intelligence technology and modern BI tools
- Strong change management and collaborative skills
- Experience with the following software: Qbyte, AFE Execute, Val Nav, Prodview, Power BI & Microsoft suite
